Moh (Zoso) Robati

ABOUT ME

AWS certified solutions architect with over 4 years of experience as a Full-Stack JavaScript developer. MERN stack is my primary choice for development, though I'm willing to compromise on the M and E parts. Whether it's infrastructure design, determining the most efficient cloud solution, DevOps and organizational operations, spinning up web servers and implementing business logic in the back-end, front-end development and client-side application design, mobile app development, count me

Critical Thinking

EDUCATION / TRAINING

AWS Certified Solutions Architect – Associate
Amazon Web Servers (Dec 2022 – Dec 2025)

Master of Applied Science in Computer Software
University of Waterloo (Sep 2021 – May 2023)

Bachelor of Science in Computer Engineering
Tehran Polytechnique (Sep 2017 – Sep 2021)

EXPERIENCE

Teaching Assistance, University of Waterloo, Waterloo
(Jan 2022 – April 2023)
I served as a teaching assistant for 4 consecutive semesters during my graduate studies at the University of Waterloo:
- W23 - ECE459: Programming for Performance
- F22 / S22 - ECE252: System Programming and Concurrency
- W22 - ECE459: Programming for Performance

Javascript Engineer, CharterHouse Lawyers, BC, Canada
(May 2022 – Oct 2022)
Building automation solutions for legal softwares so the users can do routine task pipelines faster. I helped Charthouse Lawyers with:
- Requirements elicitation
- Specifying the optimal software solution for each requirement
- Designing the access system and the central management scheme

React Native Team Leader, Utopia, Tehran
(Feb 2019 – Sep 2021)
Utopia is a start-up based in Tehran and tries to address various problems that Iranian farmers are struggling with. I helped Utopia in multiple areas:
- Requirements elicitation
- Helping with the right project management scheme
- Leading a group of four people for building a react native app from scratch
